

# Custom 3

Custom 3 earphones utilize dark gray patent-pending Contour Ear Gels that are anatomically designed to accurately fit inside the human ear canal. These soft, oval silicon tips reduce ear fatigue as well as provide an amazing seal for excellent noise isolation and bass response.

Because ear canal measurements vary, Custom 3 headphones come with five different washable ear gel sizes: small, medium, and large single flange designs, as well as small and large double flange designs.

For perfect exterior comfort, flexible ear wires bend over and around the ears so they can be customized to each user.

Inside Custom 3 earphones, you'll find exclusive KG723 tweeters, KG731 woofers, and patent-pending electro-acoustic crossover systems let you hear performances just as the artists intended—making Custom 3 an excellent choice for musicians and critical listeners.

Klipsch has gone to great lengths to ensure the long-lasting durability of Custom 3, including its 50-inch-long cables. Put through extensive “real world” testing, these headphones feature strain relief at every cable connection point to help prevent wire damage. A special PVC Wireguard jacket prevents the wires from becoming exposed and frayed.

Great iPod® headphones, Custom 3 is compatible virtually any device with a headphone jack. These headphones come with a high-quality carrying case that will also fit an 80G iPod, a ¼-inch adaptor, an airplane adaptor, five sets of different-sized ear gels, and an ear gel cleaning tool.

- Balanced dual drivers
- Patent-pending crossover design
- Tuned bass-reflex woofer system
- Superior noise isolation
- Customizable comfort and fit
- Compatible with iPods®, iPhones™ and other portable devices

## SPECIFICATIONS

Sensitivity	115 Decibel (dB)
