| BUILT FROM | 2004 |

From the softest whisper to the most intense explosion, the Synergy Series F-2 floorstanding speaker delivers the clarity, definition and power that continue to make Klipsch an industry leader.

The F-2 employs a 5-inch 90° x 60° Tractrix® Horn to create a dynamic, 3D soundstage. A 1-inch aluminum-dome compression driver and dual 6.5-inch IMG woofers deliver remarkable detail and precision. Together, this unique combination of technology recreates the live qualities of the music and movies you enjoy at home.

The custom, sculpted port—located at the bottom of the front baffle—adds to the speaker's intense low-frequency extension. Furthermore, the F-2 offers bi-wire capabilities, allowing the use of one or two speaker level inputs as desired for improved connectivity.

Available in a black finish with titanium accents, the contemporary look of the F-2 is two-fold. With its grille on, the speaker offers a sense of elegance that nicely blends in with your home's décor, but take the grille off and you get an aggressive, powerful statement that exudes extreme performance. Whichever you choose, you'll enjoy amazing acoustic output and powerful low-frequency response from a high-quality cabinet that looks as great as it sounds.
