

HD THEATER

FIVE SPEAKERS
+ SUBWOOFER

5.1

A HIGH-DEF PICTURE DEMANDS HIGH-DEF SOUND

If you own an HDTV, you're only half prepared. High-definition viewing offers 5.1 channels of superior surround sound, but you need 5 speakers and 1 subwoofer to experience it.

Meet the Klipsch HD Theater Series: three 5.1 surround sound packages that affordably add crisp dialogue, brilliant music and explosive effects to your video content. In fact, these premium speaker setups deliver the same room-filling sound that's kept us famous since 1946.

Horn-loaded technology has always been the driving force behind our remarkably accurate, compromise-free sound. It's also what made Klipsch a leader in professional cinema sound. The same

reasons the pros choose Klipsch—low distortion, low power consumption and sparkling highs—make the HD Theater Series a great choice for your home entertainment, too.

Stop watching and start experiencing with Klipsch HD Theater 5.1 surround sound!

HD THEATER

SPEND LESS, ENJOY LIFE MORE

1 0 0 0

PERFECT FOR LARGE ROOMS

A live concert performance or heartfelt movie-going experience frees us from daily complications and emotionally connects us with others. The HD Theater 1000 brings that same enjoyment to the music and films you play at home, delivering jaw drops and sighs like never before.

The HD Theater 1000 does more than just fill larger rooms with pristine performances; it looks great next to any flat-panel TV and offers simple set up and operation.

Each identical speaker is magnetically shielded—so it won't interfere with your TV picture—and can be positioned vertically or horizontally without sacrificing performance. The 1/4-20 threaded inserts make stand or wall bracket mounting a breeze.

The system's subwoofer is also quite versatile, as it includes traditional volume, crossover and phase controls, so you can customize the level of bass for your room. But more than that, this powerhouse's 10-inch driver makes sure you hear—and feel—every drum beat and explosion.

PERFECT FOR MEDIUM-SIZED ROOMS

HD THEATER

SCALED UP SOUND, SCALED DOWN PRICE

5 0 0

Don't let its small size fool you; the HD Theater 500 promises to fill your heart with joy without emptying your wallet. As a matter of fact, it has what it takes to satisfy even the most skeptical of listeners. From punk rock to classical jazz and from shoot'em up movies to tear-jerker films, this system shines.

A great solution for medium-sized rooms, the HD Theater 500 perfectly complements any flat-panel TV, while also offering simple set up and complete installation flexibility.

Each speaker, which can be positioned horizontally or vertically, comes with an adjustable wall bracket with a 40° range of motion and 1/4-20 inserts for optional floor-stand mounting. The center channel is magnetically shielded so it won't interfere with your TV picture and includes a cradle base with a 45° range of motion.

The system's subwoofer is also quite versatile, as it includes traditional volume, crossover and phase controls, so you can customize the level of bass for your room. But more than that, this heavy-hitter's 8-inch driver delivers room-rocking performances.

PERFECT FOR SMALLER ROOMS

Even though it's the most affordable Klipsch surround sound system ever, the HD Theater 300 takes a no-nonsense approach to lifelike audio reproduction. You'll be swept away by the sheer dynamics of every film, song or video game. Make no mistake, this little system equals extreme thrills and chills when it counts.

Perfect for smaller rooms, the HD Theater 300 looks great next to any flat-panel TV and offers simple set up and operation.

Each speaker, which can be positioned horizontally or vertically, comes with an adjustable wall bracket with a 40° range of motion and 1/4-20 inserts for stand mounting. The magnetically shielded center channel won't interfere with your TV picture and includes a cradle base with a 45° range of motion. All qualities that give you complete installation flexibility.

The system's subwoofer is also quite versatile, as it includes traditional volume, crossover and phase controls, so you can customize the level of bass for your room. But more than that, the subwoofer's 6.5-inch driver delivers serious heart-thumping effects.
