

## In-Ear Headphones

# IMAGE S2

These extremely affordable, high-performance earphones go above and beyond what you'd expect from the stock earbuds that come with your MP3 player or music phone. In fact, Klipsch headphones are far superior to other brands—delivering unequaled comfort, noise isolation, musical accuracy and bass.

### Amazing Comfort and Fit

The Image S2's exclusive soft and flexible oval ear tips naturally fit the contours of your ear canals, providing comfortable long-term wear as well as producing a perfect acoustic seal. A good seal minimizes outside noise, also known as noise isolation, and allows you to enjoy your music at lower, safer volumes.

These headphones come with three different sizes of washable ear tips: small, medium and large single flange designs. So light and narrow, they are almost impossible to feel inside your ears.

### Premium Sound

At the heart of every Klipsch product is over 60 years of audio expertise beating strong. Our commitment to no-compromise performance has made us the preferred choice of top cinema operators, a leader in stereo and home theater sound and now a premium name in headphones.

The Image S2 delivers strikingly realistic sound through the use of a single, moving coil driver per channel. These drivers cover a wide frequency range with dynamic detail. From heart-pounding bass to spine-tingling guitar riffs, you won't miss a beat.

- Precise, comfortable fit for long-term wear
- Superior noise-isolating design
- Delivers smooth sound with great bass
- Durable, built-in strain relief
- Works with the iPod, iPhone and other devices
