

8" Two-Way In-Ceiling Loudspeaker

R-2800-C

The affordable Klipsch R-2800-C makes discrete audio a convincing reality for almost anyone. Upholding the same high-performance standards as all Klipsch products, this in-ceiling loudspeaker employs an 8-inch gray polymer woofer cone and a 1-inch soft/silk dome tweeter to deliver superior and seamless sound.

Perfect for consumers who want high fidelity with low visibility, this well thought out speaker design is also one of the easiest to install products on the market. By incorporating a proprietary two-screw mounting solution, all it takes is one trip up the ladder to get this speaker rockin'.

Available in a white finish, this speaker can be paired with one of Klipsch's new installation kits (sold separately). Each of these revolutionary kit designs allow for increased mounting flexibility and incorporate a mud ring, wire tie and universal metal mesh wing for multi-position placement and a color-coded bracket for easy speaker size identification.

- Good sensitivity and power handling, strong bass
- Weatherized components
- Rugged ABS frame
- Time saving two-screw mounting method
- Paintable to match ceiling
